# The evolution of barefooting

When we first introduced Vibram® FiveFingers to the world, it was the beginning of a revolution.

For the first time, active outdoor athletes were able to experience the freedom and joy of going barefoot with the protection and sure-footed grip of a Vibram® sole. Their response exceeded our wildest expectations.

Some customers told us they felt more connected to the earth and more in tune with their bodies. Others discovered an increased sense of balance

and greater agility. And many reported health benefits like improved posture and less back pain. All were generous with their praise and their ideas, often suggesting new and creative uses for FiveFingers.

With the new 2008 Vibram FiveFingers collection, our patented barefooting concept continues to evolve.

Now you can choose from four distinct designs, Classic, Sprint, KSO, and Flow, to cover the wide variety of activities you would rather do barefoot, everything from yoga and Pilates to running and trekking to kayaking and sailing. Clearly, the barefooting revolution is alive and well.

*“FiveFingers are by far the most comfortable shoes I have ever owned. I live in New York City and I wear them everywhere I go, even bike riding. My feet feel great and strong.”*

*Lainie Lam, New York, New York*

## FiveFingers Classic

From day one, the FiveFingers Classic has drawn the attention and praise of the press and active outdoor athletes alike. Our patented original takes a minimalist approach to barefooting with a thin, abrasion-resistant stretch polyamide fabric that fits low on the foot—for comfort and quick drying. Non-marking, razor-siped Vibram TC1 performance rubber soles protect your feet and provide a sure grip over a variety of terrain.

## FiveFingers KSO

When you're scrambling up a rocky bluff or bounding along a riverbank, the last thing you want is gravel and grit seeping into your FiveFingers. The KSO is an all-new design with thin, abrasion-resistant stretch polyamide and breathable stretch mesh that wraps your entire forefoot to "Keep Stuff Out." A single hook-and-loop closure helps secure the fit. Non-marking Vibram TC1 performance rubber soles are razor-siped for a sure grip.

*"I have always wanted a shoe that would create the feeling of going barefoot. Now I have it! I crossed wet rocks, crushed stones, and thorns in the woods on the way to the river for kayaking and fly fishing—no problem!"*

Zebulon Jakub, Boston, MA

*"Friends, I picked up a pair while traveling. These shoes are the best invention since God created feet...I live on a rocky slope and do a lot of gardening, etc. These are the most comfortable and safe shoes. I recommend them to everyone. Five stars for five fingers!"*

Kevin Burgin, Bozeman, MT

## FiveFingers Sprint

Some have called FiveFingers Sprint the most versatile footwear they own. Adjustable hook-and-loop closures cross over the instep and surround the heel for a personalized, secure fit. A thin, abrasion-resistant stretch polyamide fabric follows the contour of the foot for comfort. And a flexible, non-marking TC1 performance rubber sole is razor-siped to disperse water and enhance grip over a variety of terrain.

Adjustable closures let you customize and secure the fit.

# FiveFingers Flow

Whether ChiRunning in colder temperatures or crossing a stream with your kayak, the new FiveFingers Flow provides comfortable barefoot protection. A 2mm Neoprene lining and EVA footbed provide thermal insulation and protection. And our new GM50 performance rubber is razor-siped for added slip resistance over a variety of surfaces.

W135

M135 & W135

M138 & W138

All FiveFingers are razor-siped for flexibility and grip on slippery surfaces.

Men's (41-47)  
Women's (36-42)

*“Five Fingers are perhaps the best shoes I have ever owned—if I can call them shoes. Everywhere I go, running, hiking or to a coffee shop, people ask me about them.”*

David Casson, Los Angeles, CA

\*Recommended for use in colder temperatures (25-40 degrees F)

A razor-siped, non-marking Vibram TC1 rubber sole mirrors the contours of your foot and provides a true grip.

Contoured rubber heel counter offers comfort and protection.

Individual toe slots enhance balance and stability to promote more natural movement.

Convenient elastic pull-tab, or hook and loop closures let you customize the fit.
